Public Notice

APPLICATION NO.:	ADS-MVK-2004-1280
EVALUATOR:	Mr. Arel Simpson
PHONE NO.:	(601) 631-5996
FAX NO.:	(601) 631-5459
E-MAIL:	regulatory@mvk02.usace.army.mil
DATE:	December 22, 2004
EXPIRATION DATE:	January 12, 2005

Interested parties are hereby notified that the U.S. Army Corps of Engineers, Vicksburg District, and the Mississippi Department of Environmental Quality are considering an application for a Department of the Army permit and State Water Quality Certification for the work described herein. Comments should be forwarded to the Vicksburg District, Attention: CEMVK-OD-F and the Mississippi Department of Environmental Quality at Post Office Box 10385, Jackson, Mississippi 39289-0385, and must reach these offices by the cited expiration date.

Law Requiring a Permit: Section 404 of the Clean Water Act (33 U.S.C. 1344), which applies to discharges of dredged or fill material into waters of the United States.

Name of Applicant:
Richard & Janet Flowers
Post Office Box 38
Tunica, Mississippi 38701

Location of Work: Section 21, T26N-R3W, latitude 34°06'55" north longitude 90°30'51" west, within the Big Sunflower River drainage basin, Coahoma County, near Claremont, Mississippi.

Description of Work: (See enclosed map and drawings.)

The following descriptions of the proposed project and associated impacts are based upon information provided by the applicant.

The applicant is applying for a Department of the Army permit to place dredged and/or fill material in wetlands associated with a furrow irrigation system.

The proposed work would involve the clearing and filling of a wooded wetland area with on-site borrow material from adjacent non-wetland farmed ridges. Approximately 600 cubic yards of borrow material would be placed in the wetlands by bulldozers and tractor pulled dirt pans. The borrow material is typed as Dundee silt loam.

The proposed project would impact a drainage area containing 8.5 acres of wooded wetlands. These wetlands are surrounded by row crop fields under a soybean/cotton rotation and suffer from sedimentation.

Approximately 8.5 acres of wooded wetlands would be cleared and filled, changing the farmed acreage in this field from approximately 28.9 acres to approximately 37.4 acres that can be irrigated and farmed.

The wetlands vegetation consists of eastern cottonwood, bald cypress, sugarberry, American sycamore, and various oaks. The cleared vegetation would be piled, burned, and buried under the borrow material.

The completed project would allow for the furrow irrigation to make a more efficient usage of the irrigation system and adjacent farm acreage.

The proposed mitigation plan would restore approximately 17.0 acres of prior converted wetlands to a bottomland forest with a conservation easement attached to the land deed. The compensatory mitigation would be at a 2:1 ratio, as suggested by the National Resource Conservation Service in Coahoma County, Mississippi. The proposed mitigation site has hydric soils and floods periodically. The mitigation area is used for row crops.

The placement of dredged and/or fill material in wetlands associated with mechanized land clearing requires a Department of the Army Permit.

Upon reviewing this notice, you should write to this office to provide your opinion of the impacts this work will have on the natural and human environment, and address any mitigation you believe is necessary to offset these impacts. Other comments are welcome, but the above information will further our review of the applicant's plan as proposed. Comments of a general nature are not as helpful as those specific to the impacts of the subject project.

State Water Quality Permit: The State Pollution Control Agency must certify that the described work will comply with the State's water quality standards and effluent limitations before a Corps permit is issued.

Cultural Resources: An initial review indicates that the proposed project would not affect any of the sites in Coahoma County listed in the National Register of Historic Places. Copies of this notice have been sent to the State Historic Preservation Officer, Federally Recognized Tribes, the Corps archaeologists, and other interested parties for comment on potential effects to cultural resources that could result from this activity.

Endangered Species: Our initial finding is that the proposed work would not affect any endangered species or their critical habitat. This proposal is being coordinated with the U.S. Fish and Wildlife Service, and any comments regarding endangered species or their critical habitat will be addressed in our evaluation of the described work.

Flood Plain: In accordance with 44 CFR Part 60 (Flood Plain Management and Use), participating communities are required to review all proposed development to determine if a flood plain development permit is required. Flood plain administrators should review the proposed development described in this public notice and apprise this office of any flood plain development permit requirements.

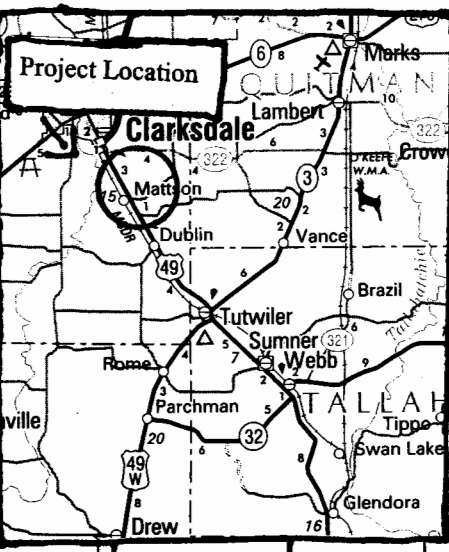

Evaluation Factors: The decision whether or not to issue a permit will be based upon an evaluation of the probable impact of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits that may be expected to accrue from the proposal must be balanced against its expected adverse effects. All factors which may be relevant to the proposal will be considered; among these are conservation, economics, aesthetics, general environmental concerns, historic values, fish and wildlife values, flood damage prevention, land use classification, navigation, recreation, water supply, water quality, energy needs, safety, food requirements and, in general, the needs and welfare of the people. Evaluation of the proposed activity will include application of the guidelines published by the Environmental Protection Agency under authority of Section 404(b) of the Clean Water Act.

Public Involvement: The purpose of this notice is to solicit comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties. These comments will be used to evaluate the impacts of this project. All comments will be considered and used to help determine whether to issue the permit, deny the permit, or issue the permit with conditions, and to help us determine the amount and type of mitigation necessary. This information will be used in our Environmental Assessment or Impact Statement. Comments are also used to determine the need for a public hearing.

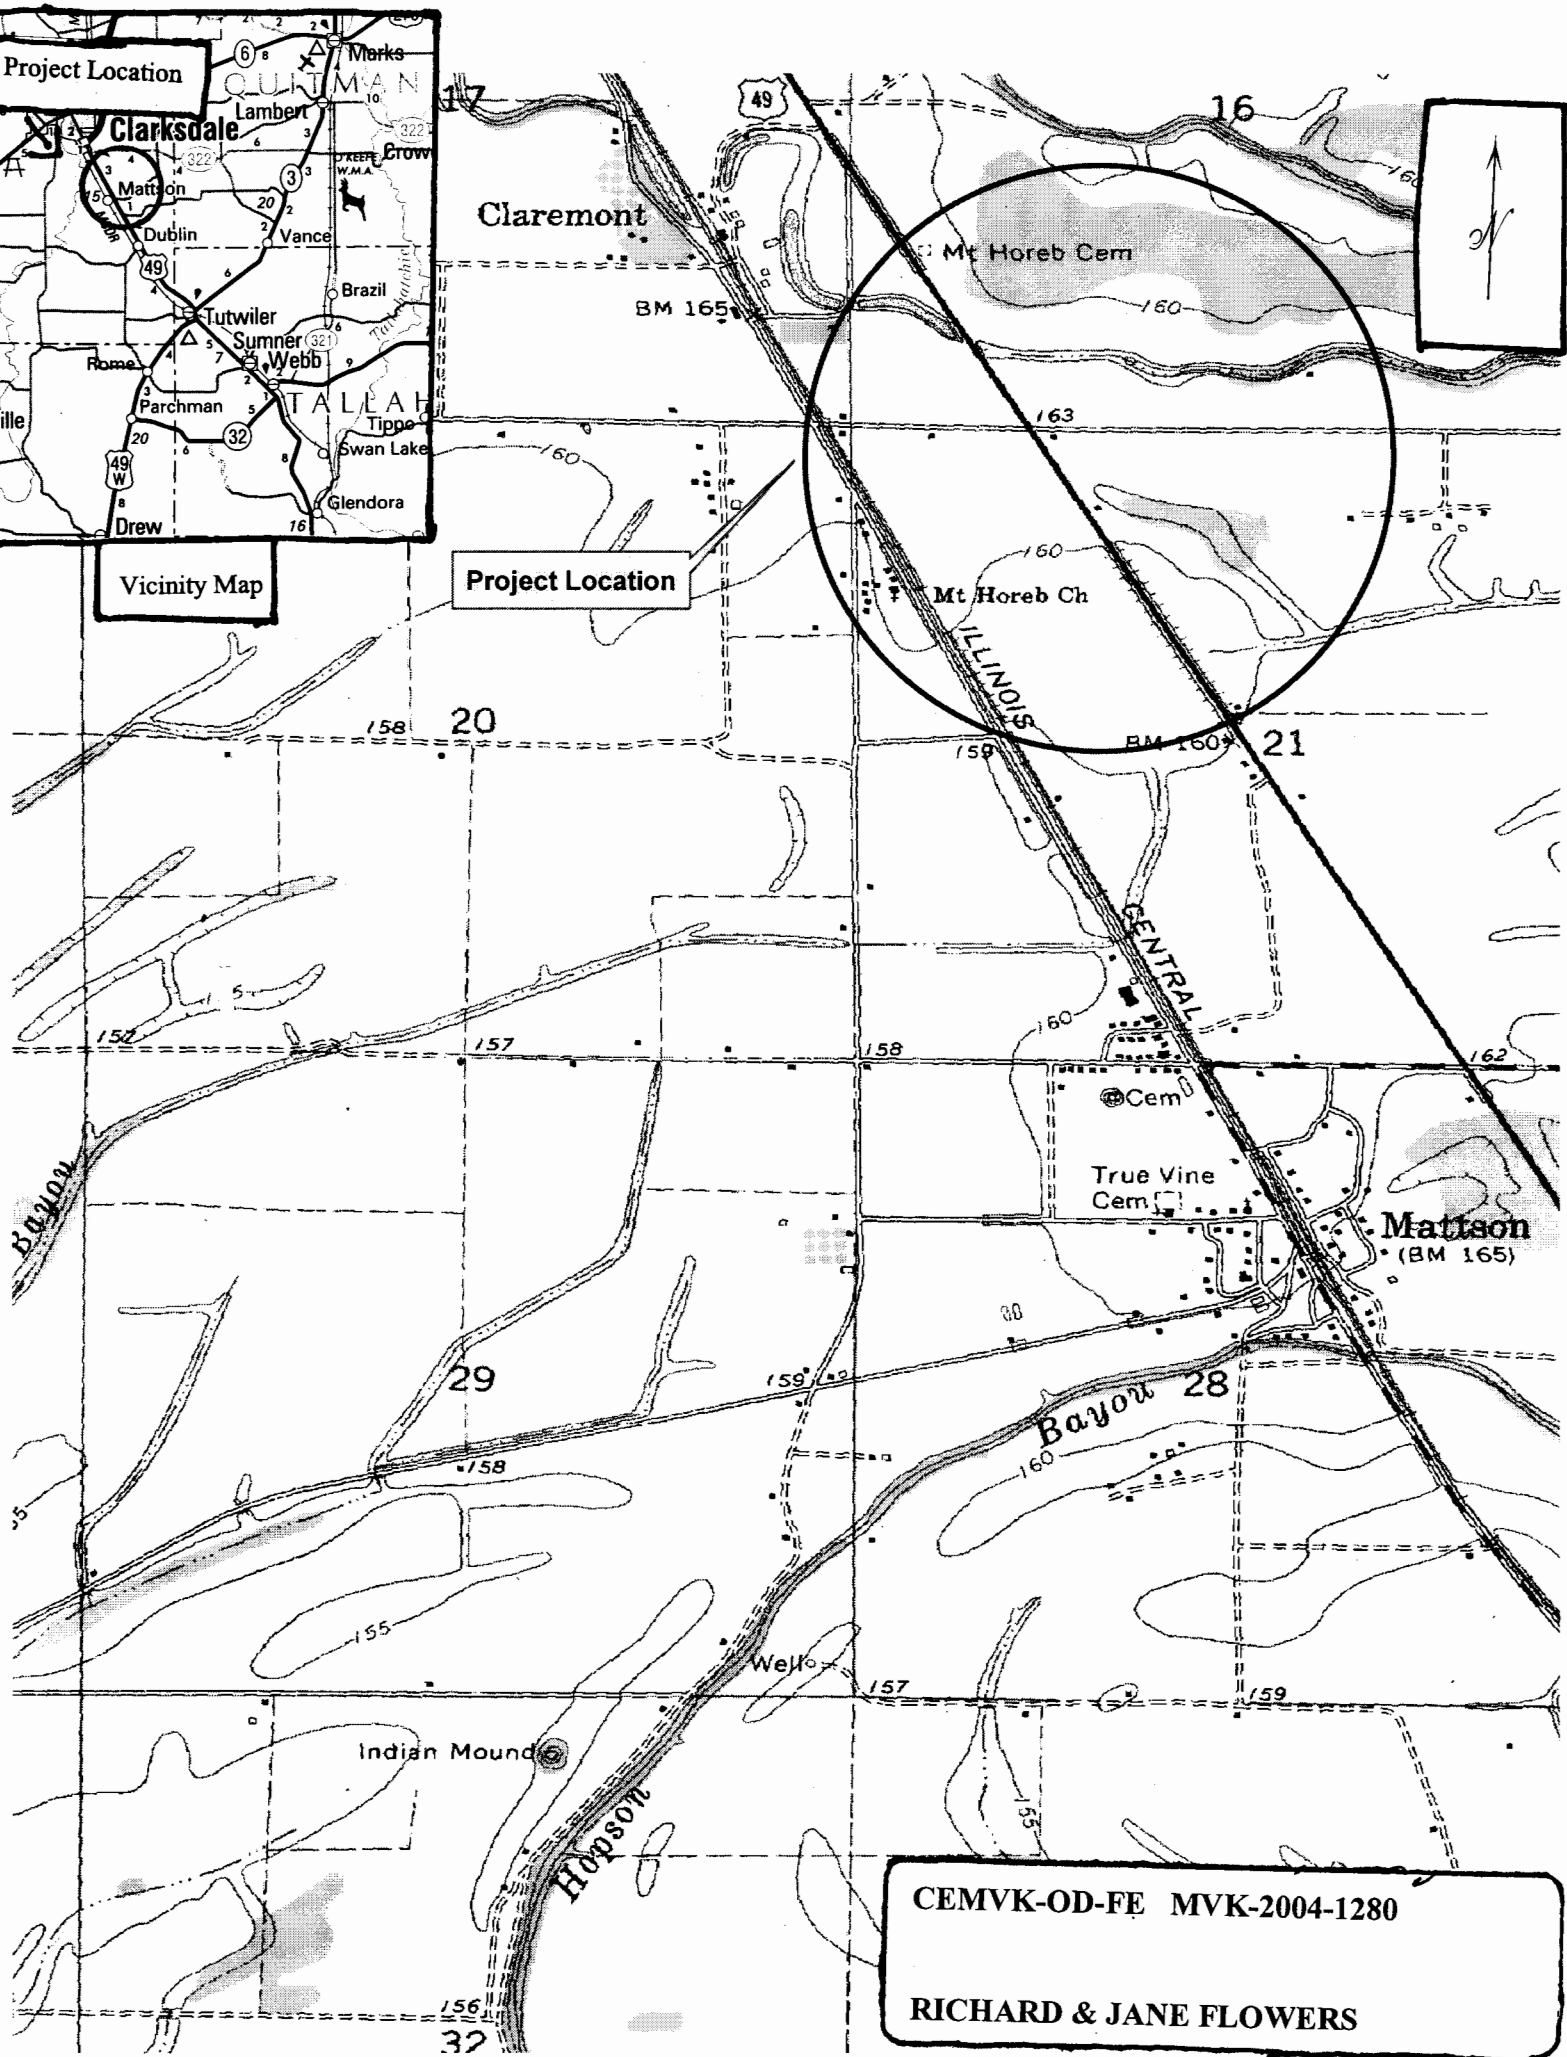

Opportunity for a Public Hearing: Any person may make a written request for a public hearing to consider this permit application. This request must be submitted by the public notice expiration date and must clearly state why a hearing is necessary. Failure of any agency or individual to comment on this notice will be interpreted to mean that there is no objection to the proposed work. Please bring this announcement to the attention of anyone you know who might be interested in this matter.

Notification of Final Permit Actions: Each month, the final permit actions from the preceding month are published on the Vicksburg District Regulatory web page. To access this information, you may follow the link from the Regulatory web page, <http://www.mvk.usace.army.mil/offices/od/odf/main.asp>, or go directly to the Final Permit Actions web page at <http://www.mvk.usace.army.mil/offices/od/odf/PubNotice/MonthlyNotice/pnmain.asp>.
